

Carrie Wood

I would like to nominate Carrie Wood for the Daisy award. I had been seen in Urology for a couple different things and Carrie has always been top notch. One day I put a call into her as I was in extreme pain, this was a Friday morning and she got me in to get a CT in Corning to see what was going on. Afternoon rolls around and she called and mentioned I needed to get to ER in Creston immediately as there was some blockages going on. She was very calm and collected and mentioned to pack a bag as well. Later that evening as I was still in ER she came down after working her shift to check up on me. She also kept my daughter who was trying to fly home in the loop of what was going on as well. I had been diagnosed with colon cancer and felt my world was turned upside down. She has checked on me numerous times through out my journey and continues to be one of the best nurses around. Carrie deserves this award, her compassion for caring for others needs recognition! I will never be able to repay her for getting me to do the CT scan and then making sure I came into the ER that day. Thank you from the bottom of my heart!
